LETTER OF RECOMMENDATION

This is with regard to Mr. Aditya Mattos, who is applying at your university for graduate studies. I have known Aditya since his second year as an undergraduate student and have taught him the subject of "Logic Design" in the third semester.

He has an inquisitive mind and good interpretation abilities that will greatly facilitate research work at your university. An intelligent and hardworking student, Aditya has a natural inclination for research as is evident from the various projects he has undertaken while in college. He has the ability to voice his ideas clearly, which greatly enhances his expressiveness in solving doubts when approached by fellow students. His extreme interest, persistent attitude and intellectual curiosity drive him to get deeply involved in his work and excel in it.

He has also shown the ability to constantly improve himself as is shown by his exponentially increasing grades. He was one of my favourite students and one of the best students in my class. He was very punctual and would submit all his course assignments, journals, etc. well before the due date.

Besides academics, Aditya has also been involved in various cultural activities. He was always an active participant in our annual college festival and would volunteer for many of the activities being held. He also has an excellent command over English and commendable public speaking abilities as could be witnessed by the various presentations and seminars he has given in the college.

In my unbiased opinion he has a rich blend of creativity, temperament and discipline required for a person who desires to pursue a postgraduate education. I strongly recommend him to the graduate program in your esteemed university.

Yours sincerely,

Mrs. Vidya Sarode

(Pursuing Ph. D.)

Head of Department (Electronics and Telecommunication Engineering)

Letter of Recommendation

This letter is provided at the request of Mr. Aditya Mattos, who wishes to apply for admission for a postgraduate degree in engineering at your prestigious institute. I have known him for over three years and am currently teaching him theoretical and practical courses in 'Digital Communications'. As our interaction increased, I realized that Aditya is not only a brilliant student, but also an active participant in social and cultural activities.

To begin with, Aditya has always been a sincere student and his academic record has been showing marked improvements, probably one of the biggest improvements I have seen. He is definitely one of the best students in my class and his command over the subject is superb. He is able to apply his knowledge of theory in solving practical problems. He is very hard working and extremely punctual with his assignments and submissions.

He also has an excellent aptitude for research as is demonstrated by the various projects he has undertaken during his years at the college. I am also a co-guide for his final year project (The other being Mr. Mayank Pande. Chief engineer, Oil and Natural Gas Corporation of India Limited), and I must admit that his project is taking shape splendidly. He has shown an extremely strong interest in the field of signal processing and his project will devise methods for mapping surfaces using sound waves.

Over the years, Aditya has been an active participant in the college cultural festival 'Spandan'. He has volunteered and participated in technical events during our technical festival 'Transmission'. He also has excellent communication skills and an excellent command over the English language as was evident in the many presentations and seminars that he has given and conducted here. All this clearly indicates that he is insightful on the range of interests represented. He motivates himself to excel and is always on the move, participating in a variety of activities.

Aditya intends to expand his horizons by pursuing a master's degree; a decision which I feel deserves full support. Based on his overall performance and personality traits, I would recommend him as a strong candidate for admission into your renowned university. I am confident that one day you too will be proud of him, just as we are of him today.

Yours sincerely,

Prof. Fr. Fabian T. R. Barreto SJ

Master of Engineering (Electronics)

Administrator and Assistant Professor (Department of Electronics and Telecommunications).
